BIAMP WORKPLACE

WORKPLACE MANAGEMENT PLATFORM

Transform your workplace management with Biamp Workplace — the cloud platform that unifies AV device management, monitoring, scheduling, and workplace design in one powerful solution.

From designing and deploying spaces to optimizing and monitoring them in daily use, Biamp Workplace covers the entire lifecycle of your AV systems. With role-based access, advanced analytics, and intuitive scheduling apps, the platform empowers IT teams, facility managers, and users alike — securely, at scale, and from anywhere.

FEATURES

- All-in-One Cloud Platform – Unified AV device management, scheduling, and workplace design with a real-time dashboard.
- Built-in tool to define and design spaces with guided product recommendations and optimized layouts.
- Remote Tesira device control with preconfigured widgets for faster issue resolution and fewer site visits.
- Digital twin of your organization with dynamic navigation between monitoring and booking views.
- Push firmware updates, reboot, locate, and run Biamp Launch™ tuning sessions from anywhere.
- Scheduling mobile app and web tools for room, desk, and parking reservations with real-time availability and floor plan visualization.
- Enterprise-Grade Security – SSO integration, role-based access, MFA, and regular penetration testing.
- Multi-Organization Support – Manage multiple customers, sites, or business units from a single login.
- Actionable Analytics – Utilization metrics, device performance data, and exportable reports to guide space planning and investments.

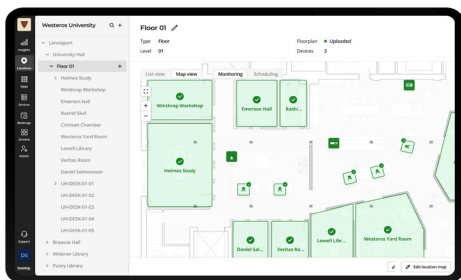

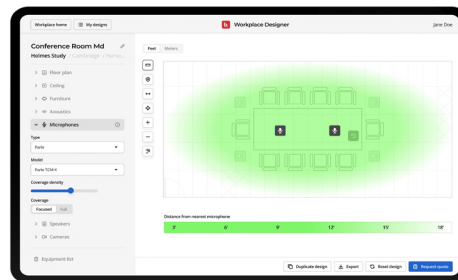

DATA SHEET

BIAMP WORKPLACE

WORKPLACE MANAGEMENT PLATFORM

WORKPLACE DESIGNER

Plan and design meeting spaces directly in Biamp Workplace. Define room types, apply guided recommendations, and create optimized layouts that connect seamlessly with deployment and monitoring — available throughout the lifecycle of your AV systems.

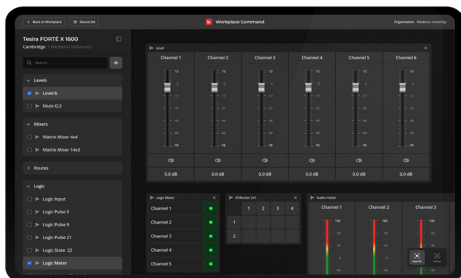

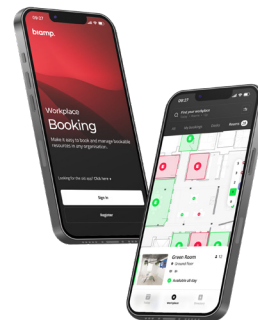

WORKPLACE MANAGEMENT

See your organization at a glance with a digital twin of sites, buildings, and floors. Toggle between monitoring view (device health, alerts, performance) and booking view (resource availability, occupancy, usage).

WORKPLACE SCHEDULING

Deliver a seamless booking experience for rooms, desks, and parking across your organization. With the Workplace Booking App, web tools, and Evoko hardware panels, users can reserve spaces in seconds and see real-time availability through floor plan views.

WORKPLACE COMMAND

Resolve issues faster with remote Tesira device control. Preconfigured widgets make operation simple, while enterprise tools reduce costly on-site visits. Keep systems running smoothly with fewer disruptions and lower support costs.

BIAMP WORKPLACE

WORKPLACE MANAGEMENT PLATFORM

WORKPLACE INSIGHTS

Turn data into action. Workplace Insights provide analytics on space utilization, device performance, and user adoption. Export reports, benchmark locations, and guide investment decisions with confidence.

LICENSING

Biamp Workplace offers flexible licenses to match your needs — from device visibility to advanced enterprise management and booking.

Management & Monitoring – Standard

Essential visibility and control for your Biamp environment. Track device status, receive real-time alerts, and manage updates from a single, secure platform

Management & Monitoring – Plus

Enterprise license that unlocks proactive monitoring, advanced analytics, remote configuration, and alerts. Divided into three product-linked tiers (Black, Red, White).

Command

Unlock remote control capabilities for Tesira devices. Use preconfigured widgets to send commands, adjust settings, and resolve issues from anywhere through Biamp Workplace.

Booking

Schedule spaces with ease using Workplace built-in booking tools. Includes the Workplace Booking App for a smooth mobile experience.

Booking Plus

Everything in Booking, with added calendar integration for room booking through Microsoft 365 and Google Workspace.

BIAMP WORKPLACE

WORKPLACE MANAGEMENT PLATFORM

ARCHITECTS & ENGINEERS SPECIFICATIONS

The workplace management platform shall be a cloud-based solution providing comprehensive control, monitoring, and management of audiovisual systems, room resources, and facility assets. The workplace management platform shall provide device management and monitoring capabilities integrated with room and resource scheduling functionality. The system shall include comprehensive analytics and reporting tools, along with robust user management and authentication systems.

The platform architecture shall be cloud-hosted. The system shall be accessible through a web-based interface via standard browsers and include mobile application support for iOS and Android devices. A GraphQL API shall be provided for third-party integration purposes. Security implementation shall support OIDC/Oauth2 for SSO integration. The system shall implement role-based access control and multi-factor authentication, with regular security audits and penetration testing.

Device management capabilities shall enable remote firmware updates and device configuration management. The system shall provide real-time status monitoring with automated alert notifications.

The scheduling system shall incorporate room booking, desk reservation, and parking space management functionality. The system shall prevent resource conflicts and integrate with Microsoft Office 365 Google Workplace calendars.

Analytics functionality shall provide real-time utilization metrics with custom reporting capabilities. The system shall support data export in CSV format and provide both historical trend analysis and device performance tracking.

The system shall be compatible with Microsoft Azure AD, Google Workspace, Microsoft Office 365, and Biamp devices.

The management software shall be Biamp Workplace.

Biamp, and Biamp Workplace are either trademarks or registered trademarks of Biamp Systems, LLC in the United States and other countries. Other product names referenced may be trademarks or registered marks of their respective owners and Biamp Systems is not affiliated with or sponsored by these companies.
